INSTRUCTIONS FOR INSTALLATION AND USE

Important information:

Before positioning, installing and commissioning the device, read this instruction manual carefully as it contains important information on assembly, safety and use.

Do not change or tamper with any part of the device.

Improper use could harm people and/or objects.

Besenzoni S.p.A. cannot be held responsible for damages caused by failure to follow these instructions. Keep these user instructions safe and pass them on to any future users.

Only a specialised technician may install the BUC Besenzoni Unit Control contained in this box. You may find it useful to check the “Assistance and Resellers” section in the Besenzoni Control Device App, which includes a map of our official Service points that you can contact.

This box contains:

- A** 1 **BUC - Besenzoni Unit Control.**
Bluetooth Receiver / Adaptor **code 7FF99617** to be used with up to 8 smartphones/devices.
- B** 1 cable with split for connection to the 6-key control panel for moving the retractable gangway to be used in the presence of systems without dual output.

*The instructions for installation and use in Italian and English are available on:
www.besenzoni.it/landing/buc*

INSTALLATION PROCEDURE

- Remove the power source from the system that controls the passerelle.
- Install the BUC receiver/adaptor far away from heat sources and electromagnetic disturbances.
- Connect the connector cable of the BUC Besenzoni Unit Control to the electronic control unit of the retractable gangway:

Option 1: In the case in which the electronic control unit is already equipped with double input (from 2018 onwards):

- Leave the electronic board connected **fig. C** on the 6-key control panel of the retracting gangway **fig. D**.
- Connect the receiver/adaptor BUC **fig. A** directly to the gangway electronic board shown in **fig. C** in the free socket on the electronic board.

Option 2: In the event that the electronic control unit does not have a double input:

- Use the cable **fig. B** to connect both the BUC and the 6-key panel **fig. D**.
- Take note of the password on the label attached to the front of the BUC.
- Power the BUC circuit board with the electronic junction box line stabilised at 12/24 volts.
- Restore power to the system.

ACTIVATION PROCEDURE

- Activate the device's bluetooth.
- Open the App on your device.
- Click Settings from the dropdown menu in the top left-hand corner.
- Choose and set an unlock code which you will also use in the future.
- Deactivate the Demo mode and tick "Start in Command View".
- Click "Set Device Code" and **insert the 5 digit security code** shown on the BUC label
- Click "Select device" and select the device that corresponds to the name shown on the BUC label: e.g. Name: Besenzoni1010.
- Click the Dropdown menu button.
- Click Command and then the screen to start the App.
- The commands to control the passerelle will appear in the next screen.
- In order to correctly control the passerelle, you must press and hold the selected command, otherwise an Error message will show up on the device's screen. To restart the controlling operation, press and hold the command again.

PROCEDURA AZZERAMENTO DEVICES MEMORIZZATI:

- 1) Open the lid of the BUC by removing the 2 screws.
- 2) Press the **S1** button indicated in the image for 2 seconds until the **blue LED** goes out.
- 3) Close the receiver cover.

NOTA

Settings: by selecting Launch Commands when you next open the App, once you have inserted your unlock code, you will have immediate access to the commands section. Controlling the passerelle via the App still allows you to use the remote control that you have been supplied with.
